MISSION STATEMENT

To provide citizens with support and resources and to assist those who require specific services regarding an emergency situation, crisis event or emotional health needs. Anyone can have a crisis event at any given time. In mental health terms, a crisis refers not necessarily to a traumatic situation or event, but to a person’s reaction to an event or a dramatic emotional or circumstantial upheaval (strong or violent change in a person’s life).

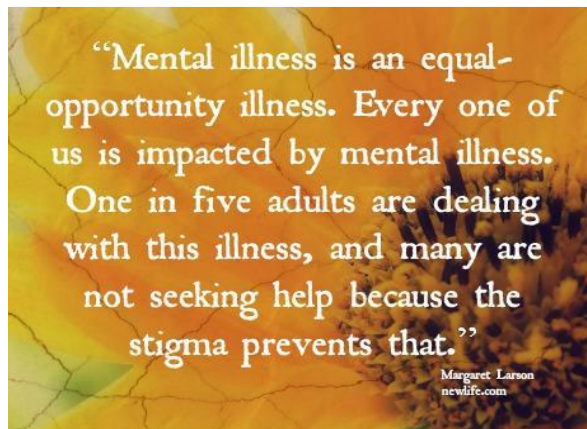

Family First

PURPOSE AND GOAL

The purpose of the program is to be a resource to the community. The goal is to help assist others in the attempt to prevent future crisis events. This goal is achieved by following up with and providing the person or the family with assistance and support to help give them the quality of life a Rowlett citizen deserves.

In addition to providing personal assistance, another goal is to provide updated information for Rowlett Emergency Response Units regarding Rowlett Citizens and its visitors who have a known mental or physical conditions so that quick, accurate and appropriate care can be given.
